

PUBLIC COMMENT RECEIVED 03/16/2021

CPAD Board and Manager,

My email was noted as delivered March 15, 2021 at 3:39pm. As this is public comment rendered in relation to an agenda item, I would request this be added to the CPAD webpage listing related documents. This is a common procedure and helps maintain that we are in compliance with requirements under the Brown act.

Thank you in advance for your assistance!

Sincerely,

Chris Cockrell

CPAD BOARD and Manager,

Given the "dire" nature of the finances at CPAD it would seem prudent that one of the last items that we'd purchase would be another gas powered conveyance. There is absolutely no way to predict what future costs are going to be especially if this is used off pavement within CPAD. It is not reasonably prudent for a government agency to purchase used equipment and expose taxpayers to this liability.

A couple other items related to this proposal:
As well, there is no cost indicated for annual insurance premium.

Any off CPAD business should not be authorized and have any employees reimbursed for their mileage.

Many local businesses will deliver items for free. If they are not able to accommodate then have UBER pick it up.

These are just a couple highly valid thoughts about this and CPAD just really cannot justify purchasing, maintaining, and insuring a vehicle.

Sincerely,

Chris Cockrell
